# MODULE SUMMARY

## Leading Recovery and Building Economic Resilience for your Community

**This module provides participants with the key principles of economic recovery to implement following a disaster, crisis or downturn. The module also builds knowledge for community leaders seeking to build economic resilience within their communities.**

Natural disasters, such as bushfires, floods and tropical cyclones are an enduring part of the Australian experience. They are often a very traumatic event for the community involved and can also have severe local economic impacts.

Elected Officials need to understand risks to local economies and how to recover from disasters and build economic resilience.

### Learning Objectives

For this session, the learning objectives are:

- Understand the level of risk in your local community and economy
- Understand the key principles of economic recovery
- Explain the implications of disasters for governments, individuals and communities and business
- Describe the three stages of recovery following a disaster.
- Understand the importance of economic recovery actions in the longevity of local economies

### Topics Covered:

- Understanding risk
- What does resilience mean?
- Implications for Governments, individuals, communities and business
- Three stages of recovery
- Recovery actions
- COVID impacts
